# IP Address Blocker

Hits: 2,031

**Description:** Ban unwanted visitors from your website using this remotely hosted IP Address Blocker.

Great tool if you don't have the ability to place PHP scripts on your website/homepage or if your website/blog is remotely hosted and a Javascript IP Ban doesn't work.

This tool will work!

## Resource Specifications

<b>Version:</b>	1.0
<b>Platform(s):</b>	linux, windows, freebsd, osx, sun
<b>Date Added:</b>	Sep 27th, 2006
