I have to say I was very disappointed in this package. Pretty much everything you get is on their demo site. I figured the "fully" documented software would come with a PDF explaining more of the workings, but it doesn't. Also, when we were testing this swaps didn't seem clear properly. I'd strongly recommend thoroughly using their demo from all sides before buying (i.e. try every function from the buyer/seller side). We uninstalled and went with something different.

**Unique script and easy to use**, Sep 6th, 2007

I was looking for web script to create an online swapmeet like swapsimple. I am glad I found eSwap. I was able to install on my server and customize it within less than an half an hour. For a new feature we needed some help with server configurations, which the iScripts folks helped out quickly. I would recommend this software.

PS: It does come with documentation on installation and setup.
