# Stars Rate

Hits: 10,246

**Description:** StarsRate is a "rate my pic" type of script used to poll your web site visitors. If you've always wondered what other people think about your images, articles, posts,.... it is now easy to find out. When creating a polling item you can choose how many stars it will have, titles for each star, if and how voting results will be displayed. Just try out the DEMO administration page and you will see how easy it is to work with StarsRate voting script.

## Resource Specifications

<b>Platform(s):</b>	linux, windows, freebsd, osx, sun
