iScripts.com MultiCart - Multiple Vendor store front

Hits: 10,247

Description: iScripts.com MultiCart is a unique shopping cart supporting multiple vendors to provide a single storefront. It enables you to crate an aggregate store with vendors integrated very well. These mechanisms work well in the niche vertical markets with fragmented vendors with low volume. The Store operator provides operational, marketing support in exchange for a commission. The MultiCart script is an entire business model in a script and can be installed in few minutes. Vendors can add items, fix price, upload pictures etc..When end consumer purchases something from the store vendors get notified with shipping address and instructions. Once customer receives item you, store operator release the money to vendor less commission. There is a powerful admin section to manage all aspects of the store. Integrated affiliate software enables you to market the mall to users effectively. Entire script is open source, so you can customize as required.
