Improves work flow, Jan 13th, 2007

Reviewed By: sagentic

The program is pretty robust and will take a few more steps than just writing things down in a calendar. Depending on how many clients you have to manage, it is worth the effort. This system will improve your work flow by helping you keep track of each project and associated tasks. Employees must keep it up to date to work effectively. Clean interface and very easy to install and set up.
