# Creating Word Files Online

Hits: 1,287

**Description:** ASP has the ability to dynamically output any kind of office application format. Before to start coding, The first thing we need to do is set correct file type. Becase the browser needs to know what to do with the file. Second step is to edit file name. You can use HTML and CSS to create styles in your word document.

## Resource Specifications

<b>Platform(s):</b>	windows
<b>Date Added:</b>	Oct 5th, 2006
<b>Last Updated:</b>	Oct 5th, 2006
<b>Author:</b>	Dotnetindex.com

**Average Visitor Rating:**  **3.00** (out of 5)

Number of Ratings: 3 Votes

**Average Member Rating:**  **0.00** (out of 5)

Number of Reviews: 0 Reviews
