Survey Exam Learning Management System SELMS

Hits: 1,012

Description: Create surveys and exams for online testing. Multi page surveys, multiple questions and more:
Surveys can be linked to courses, user registration, exams, and other surveys. Exams for competency testing, feature random question sets, random question and answer order, and question/answer weighting: integrated scoring/grading. Question types: true/false, multiple choice select one, multiple choice select multiple, and essay. Reports by user and by survey feature Flash based graphing. Add Classes: Integrate learning objects by adding a title, description, and directory path (or URL); specify topic areas and course credit; built in course listing, registration, and user authentication for course access. User registration offers flexibility with optional custom form fields and the ability to set required/non-required field status. See Site for demo. Available encrypted and unencrypted. Also can be a hosted application on our servers.

Resource Specifications
