Pagecast

Hits: 4,098

Description: Pagecast is a Python program for automatically submitting lists of URLs to Internet search engines such as AltaVista, Hotbot, Lycos, Excite, etc. These search engines will add the URLs to its queue for "spidering" -- it will in turn look up each URL and add the pages contents to its database.

Resource Specifications

Version:	2.0.0
Price:	Free (GPL)
