## A Better Color Picker

Hits: 2,987

**Description:** Free HTML color picker palette JavaScript controls that make it easy for your visitors to fill out color value field(s) by selecting the color from a DHTML or PopUp Window color palette. Allow your visitors to enter a color value into a form field without overloading your pages with extraneous JavaScript code. Six different JavaScript generated color selection controls. Easy to manage, easy to install, and easy to setup JavaScript color picker input controls that will fit any need. Can be attached to any number of existing form fields. All JavaScript enabled browsers supported. Can use DHTML or regular PopUp Windows. Easy setup - no special programming skills required. All scripts are free for any applications. Easy to understand tutorials, sample code, and documentation included.

I think its great that Free-Color-Picker.com offers their color selection scripts in 6 different versions - all for free! The best thing is that they are super easy to setup and use, extremely fast loading and most importantly, they provide a very professional looking way for my visitors to select a particular color value.

Thumbs-up to the programmers at Free-Color-Picker.com and if I could give them a 10 rating I would!
