## Joomla Most Search Terms Component

Hits: 960

**Description:** Most Search Terms is a frontend component that allows you to show most search terms in your Joomla site. It is configurable and customizable from configuration panel easily. You can adjust column and line number, page and component title, line styles and number of terms that will be shown on component frontpage. Most search also has the ability to create SEO friendly pages: You can set meta description and meta keywords tag from the configuration section. Meta keywords are automatically selected from the beginning of the most search terms, so it is not necessary to enter meta keywords word by word. Most search also has multi language support so that you can easily adapt it to your website. - Easy customizable.

- Multilanguage support.
- Configuration panel.
- SEO support.
- Automatically checking new version. (User defined)
