# Validate/Format Social Security Number Hits: 2,004

**Description:** The purpose of this script is to format and validate Social Security Numbers in a form field. The script strips all non-numeric characters and then validates that the remaining characters are sufficient to make up a valid SSN. If there remaining string is 9 characters in length, the script then formats by adding a "-" after the third and fifth digits. Resulting in a mask like ###-##-####.
