Core Fusion

Hits: 3,849

Description: Core Fusion is a community where people of all abilities can get help with learning the PHP web scripting language. Members can read, write and improve upon tutorials as well as posting code to be checked by our other members. The main idea of Core Fusion is to help anyone be more productive and to enjoy coding web sites using our favourite language:PHP.

As well as PHP there is also a light-hearted general discussion where you can talk about practically anything.

Members are also able to receive free hosting with PHP and MySQL support after they have gained some experience.

Resource Specifications
