Silentum Counter Plus

Hits: 15,271

Description: Silentum Counter Plus is a basic PHP counter that uses individual images to display each number on the counter. There are three different styles for the counter: Regular, which uses the Vivaldi font, making the counter much fancier than regular text, or two different types of Digital, making the counter imitate a digital clock. This is an excellent counter if you want to spruce up your page, but don't want to hassle with using a remotely-hosted service that places their ads all over your counter. It uses only two PHP files, and doesn't require any MySQL.

Great basic script, Jul 5th, 2007

Reviewed By: brendanmonahan

This is a great basic script that is easy to install and use. The only problem I ran into is when I tried refreshing my page 100 times in a row by clicking the refresh button with reckless abandonment. I don't know why, but it caused the script to stop working. I had to remove the script and counter and then reinstall. Don't do what I did and you shouldn't run into any problems. You can see the counter in action at <http://www.commercialpropertyappraisal.com/>
