Country Code List Tool

Hits: 2,119

Description: If you're like me and you have to build a fair number of internationalized forms, then you know what a pain it can be to find a list of countries in the proper format. This tool helps you process country data in a variety of styles, including XML, HTML select/option list, CSV, tab-delimited, or just a long list of every recognized country (or country code) on Earth.

Resource Specifications

Version:	1.0
Platform(s):	linux, windows, freebsd, osx
Date Added:	Oct 30th, 2006
Last Updated:	Oct 30th, 2006
Author:	Jon Roig

Average Visitor Rating:  **4.00** (out of 5)
