Iudhost

Hits: 5,051

Description: A really essential script for all webmasters that want to keep track of everything that is going on with their customers, hosting and domain services.

Features:

- * Make list of all you clients.
- * Make a list of all your hosting plans.
- * Organize them by associating domains to clients and to packages.
- * Get instant financial reports
- * Filter results
- * Easy installation. Just a few detailed steps.
- * Multilanguage support. English and Greek are currently supported but you can translate just one file and translate all script's text. (please e-mail translations at webmaster (at) hostin (dot) gr
- * Automatic e-mail report sent to you daily and automatic e-mail sent to your clients to let them know when their domain / hosting is about to end or has ended.
- * E-mail templates of the e-mails sent to your clients so you can easily customize them.
