LuckyZoom

Hits: 4,106

Description: LuckyZoom is the best way to display your images in incredible detail. Your customer does not need to click anything - they just move their mouse over image and can see every detail in your product! Features include: Fast – the page loads as normal and then the high resolution zoomed image downloads invisibly in the background. Easy – you can add LuckyZoom to your website with only 3 lines of code. That’s it! There are some other scripts that come with the product, but you don’t need to worry about them. Customisable – you can change the size and position of your images to suit your website. Reliable – the code works on all major browsers (IE, FireFox, Opera, Safari & Konqueror).
