The News'n Letters Autoresponder

Hits: 795

Description: This is a tool full of AJAXed features. The focus of this application is DELIVERABILITY. Some of the features of News'n Letters are sending messages and managing ALL your lists from a single place (it can be installed on a single hosting account, but it can manage lists from unlimited websites), the Smart Sender technology - an unique advantage available only on the News'n Letters autoresponder: when your server has problems sending emails to your prospects, News'n Letters tries to find a different way of delivering the message to your subscribers. RSS feeds ENABLED - generates RSS feeds based on your newsletter's content. It can send one/more attachments at a time to your prospects, it is Time Zone enabled, and contains more features than any other competitive autoresponder out there. Please visit the features page from our website to get a complete list of what News'n Letters is able to do.

Resource Specifications

Version:	v2.01
Platform(s):	linux, windows, freebsd
Date Added:	Nov 5th, 2006
