TSCfmFeedback - Ajax & Coldfusion Contact Form

Hits: 1,228

Description: This Dreamweaver extension allows creating feedback/contact forms that does not requires reloading the page when opening the form and sending the message. The form's access is visible always on the page by using dynamic positioning, even when scrolling large pages. The communication with the server is done using Ajax, so your user never leaves the page when sending the feedback message. It's easy to use this feature since it's packed as Dreamweaver extension, you don't need any programming skills.

Resource Specifications

Version:	3.5
Platform(s):	linux, windows, freebsd, osx, sun
Date Added:	Nov 12th, 2006
Last Updated:	Oct 19th, 2008
Author:	Trio Solutions

Average Visitor Rating:  **4.95** (out of 5)

Number of Ratings: 21 Votes

Average Member Rating:  **0.00** (out of 5)
