ZebraFeeds

Hits: 5,910

Description: ZebraFeeds is a web-based RSS/ATOM aggregator. With ZebraFeeds, you can aggregate news from your subscribed newsfeeds into one or more pages.

ZebraFeeds can be integrated on your web site or your blog with minimal efforts and high level of customization.

You can also use ZebraFeeds as personal web-based news aggregator, with reasonably convenient user interface, inspired from what modern aggregators feature.

You have a personal web space ? Why not adding a news aggregator that allows you to read your news from any web browser, wherever you are connected? ZebraFeeds is released under the GPL.
