## FusionCharts - AJAX enabled Flash Charts for JavaScript

Hits: 3,853

**Description:** FusionCharts lets you create animated, interactive and data-driven Flash charts & graphs for your JavaScript applications. Using FusionCharts, you can generate dynamic charts and graphs on client-side, without the need for any server side scripting language or page refreshes. Fully AJAX enabled, FusionCharts makes full use of the fluid beauty of Adobe Flash to create compact, interactive and visually-arresting charts. However, you do NOT need to know anything about Flash to use FusionCharts. All you need to know is your JavaScript code. FusionCharts offers over 50 2D and 3D charting styles for you to choose from, including advanced charts like scroll and data-selection charts.

### Resource Specifications
