## Sava's Link Manager v 2.0

Hits: 8,118

**Description:** PHP/MySQL links page for your website.

Features:

Easy to use admin panel (edit/delete/add links).

Cool display - can be integrated into any website.

Link counter - displays how many times a link was clicked.

Users are able to submit links themselves, but are shown only after admin approval.

Shows a links description also if you enter one so your visitors know what that site is about.

HTML Description for the website: Add banner or other HTML stuff about that website

You can download the version above or you can try the v 2.0

New features for version 2

- links are now displayed in categories
- script can show up just a number of links for each category on first page
- the ability to view all the links in one category by clicking on the category name

You gotta have register\_globals turned on for the script to work
