InputDraw - Ultimate flash draw component

Hits: 1,756

Description: InputDraw is a cross-browser, fast, simple to integrate widget to use in your forms as a drawing tool and everywhere else as a viewer. It uses SVG as a describing language of drawing. Being a standard, SVG can afterwards be use be a large number of applications, widgets and libraries.

In order to use this widget, you don't need to be a programmer or even know any web programming language like PHP, Ruby, Python, .net, Java, Smalltalk, etc.. Actually, you only need to know some html, what a form is and our JavaScript command to make it work.

InputDraw uses flash technology so almost everyone can use it. Remember that there are more installations of flash than windows.

Resource Specifications
