# Powerful Web Application Testing Solution

Hits: 1,063

**Description:** QTest is an automated load testing solution able to measure and predict the behavior of complex Web-based applications on a global scale.

QTest can be very quickly rolled out on light testing platforms, attaining unequaled levels of performance (>10,000 simultaneous users). This tool combines power and user-friendliness while reducing the traditional costs related to this type of software.

| Resource Specifications |                     |
|-------------------------|---------------------|
