DB2ASP Creator

Hits: 1,652

Description: With DBASP Creator you will be able to generate all the administration pages for your Web site yet code HTML and VbScript (ASP) from a Access database, and testing directly before to upload to the project on your Web server, and if you do not have installed no Web server (IIS or PWS) locally you do not worry, DBASP Creator already has their own Web server that supports ASP pages!

In this version available for gratuitous donwload, three pages by table are generated:

- Visualize (paging)
- Add data
- Edit data
- Delete data

One create the project, other pages generated:

- Connection to the data base (DNS Less)
- Default page (default.asp)
- Menu with all the options
- Page for access by means of password (login.asp) - Page of logout administration (logout.asp)
- Page that closes and destroys the connection object to the data base.

Resource Specifications
