Validation ASP.NET 2.0 Example RB2

Hits: 649

Description: The RequiredFieldValidator control ensures that the user does not skip an entry. The control fails validation if the value it contains does not change from its initial value when validation is performed. If all the fields in the page are valid, the page is valid.

Resource Specifications

Version:	1.5
Platform(s):	windows
Date Added:	Dec 20th, 2006
Last Updated:	Dec 20th, 2006
