Reports Administrator

Hits: 675

Description: Reports Administrator is a utility designed to make the VELs Personal Learning Goals reporting process easier for Markbook / Accelerus Administrators. Reports Administrator collects student and teacher comments and then simply exports a CSV file which can then be imported into the Markbook / Accelerus package easily via central or the subject coordinators module. Reports Administrator provides secure administrator and student login access, thus ensuring data is protected from unauthorised users. Reports Administrator is the ideal solution for Markbook schools because it collects all of your students comments via any web browser in your school without your students getting access to the Markbook database or software. Try the Reports Administrator Demo now at <http://reportsadmin.fusionscriptz.com>
