Freelancer Panel - Advanced Management Controls for Freelancers

Hits: 8,041

Description: Freelancer Panel is software that allows freelancers and non-freelancers alike to operate much more efficiently. Freelancer Panel allows for content management (CMS) for managing your portfolio, products, and services. It is also coupled with a shopping cart for digital downloads upon purchase. You are able to keep track of your projects, and you even have the ability to create a todo list for each project, so you know exactly what you have to do.

Client communication is crucial to any business. This is why Freelancer Panel is coupled with a fully featured helpdesk, complete with different ticket categories, and even a knowledgebase.

You are able to keep track of your clients invoices either through the shopping cart, projects, or even miscellaneous invoices. Support for all of the major payment gateways is provided of course.

All this and more is built directly into Freelancer Panel.

Awesome Product!, Sep 6th, 2007

Reviewed By: med-mon

I fully recommend it. The developer is very understanding and helpful, more so than I expected. The functionality of the software is amazing and designed for many types of digital freelancers. My only dislike is the inability to edit some pages because of the security. However the developer is very fast with getting something together that will overcome the need to manually edit stuff and with the idea of plug-ins available in the future I will probably never out grow this product.
