# vScroller

Hits: 1,932

**Description:** The vScroller is a continuous vertical scrolling component that is controlled by XML. The appearance of the vScroller can be adjusted by setting the attributes in the XML, the speed and direction of the scrollers, colours of the scrollers...to name but a few things, can be altered. The content of the scrollers can also be updated easily with the XML, images and text are dynamic and simply editing the XML will update your content....no need to republish your flash file!

### **Great flash scroller**, Jan 3rd, 2007

Reviewed By: aeoncube

I brought this script for only £5 and have to say one of the easiest xml to work from.

The system works really well with image resizing, I thought it would make my images really bad but after I tried it the quality was just right.

I have had many friends comment and wanted it on there website.

So over all works really well, and if you are unsure try the demo and see what you think.
