TNT Comments Script

Hits: 8,281

Description: This Comments Script will allow your visitors to post comments about your web site content, simply include a code line at the end of your pages and the comments will appear on that page.

Script has many options and features like image verification (against spam), submit form fields can be enabled or disabled (name, email, image verification), admin can click the comment to quickly delete or edit a comment. The form remembers submitters name and email and auto-fills the form next time. Admin can receive a detailed email when a comment is posted, admin email will contain link to that page, a link to delete comment if needed, submitters name, comment, etc. Script saves the data inside a plain file on server, no database is needed. Admin can also chose if latest comments are on top or at bottom. Comments style is customizable by the CSS file.
