## (Back) link checker

Hits: 713

**Description:** This function is usefull for peoples with a link directory where the links are stored inside a (MySQL) database. The PHP script is easy to use to find out if a reciprocal link still exists on the corresponding webpage. It takes care about the trailing slash in urls and can be used with (almost) every url. Inside the function is a check against a regular expression pattern and the result is a simple boolean.

### Resource Specifications

<b>Platform(s):</b>	linux, windows, freebsd, osx, sun
<b>Date Added:</b>	Jan 14th, 2007
<b>Last Updated:</b>	Jan 14th, 2007
<b>Author:</b>	IT-Guru
