## WebAPP NE: Web Automated Perl Portal Networks Hits: 2,674

**Description:** The latest WebAPP (WebAPP V. 1.0 SE) offers many robust, interactive features, including:

- Articles archive, with unlimited categories
- Forum, with unlimited categories and nested message boards
- Private Messaging, offering folder management and flexible user filing
- Who's Online, with quick links to IM and Profile info
- Memberlist, sortable with links to IM, Profile and Email
- Download and Link sections, with descriptions, list of latest entries and user rating
- Stats, offering extensive details regarding site and user demographics
- Site Administration, offering browser-based admin control of most site functions
- About, Contact and Help pages, fully integrated and easily customized
- Custom Welcome messages for both guests and registered members. Additional editable areas called Blocks can be created as needed (or mothballed) as needed.
- Special attention given to site security and the latest HTML protocol compatibility.

**I have been searching for years for such a script.**, Feb 2nd, 2007

Reviewed By: bingo123

I have been searching for an open source automated web portal script for over 7 years now, with a collection of approx. 20,000 diverse scripts my search has just ended when i found this script!

It is the most secured flat perl portal out there, multilingual, a fantastic support time and many many free addons and plugins. Just one warning, it is extremely addictive! Don't say I did not warn you...

**Similar to Web-APP.org (original)**, Jul 18th, 2007

Reviewed By: bantychick

This script is similar to the original script from web-app.org, but web-app.org is now ahead to a later version. I helped with WebAPP NE's (Network) version of WebAPP but left that group when it was at version 0.9.9.3.4. For more history of the WebAPP project back to 2002, please see the archives at [web.archive.org/web/\\*/http://www.web-app.org/](http://web.archive.org/web/*/http://www.web-app.org/) . Also the original project has a listing here at Hotscripts in the Perl Portals category. I see some people from the WebAPP Network have left comments.

**Evil chicken...**, Dec 23rd, 2007

Reviewed By: webapp

We are having troubles with an evil spamming chicken who claims to own scripts that were created before she was not even existed.

All the original evelopers of WebAPP moved to web-app.net 2 years ago after the original creator Carter has resigned from the project. Since then a confused chicken (with an endless hobby of spamming with links to her chickens distribution business) has bought his site and worked hard on pretending that she owns the script she stolen from the original developers.
