# FgaleriX v0.52 Flash gallery

Hits: 10,592

**Description:** The easiest way to create a flash based gallery to your site it only requires one swf and one php file the rest is your folders. Advantages to other galleries which are like Fgalerix are:

- 1 - NO need to create thumbs (which will take time and need caution)
- 2 - NO special administration (you will only organize your folders)

You will find installation instructions and other issues in the zipped file.

\* Version Changes for SWF

\*

- \* - Added One by one preloading.
- \* - Added names for the files.
- \* - Added file count for the folders.
- \* - Adjusted the scrolling for a better, faster and smoother one
- \* - Added file count for the cathegories.

\* Version Changes for PHP

\*

- \* - Added control for ignoring files other than JPG files not to cause error be cause of
- \* unwanted filetypes inside folders.
- \* - Added filename data to be seen inside flash

System Requirements: Flash Player 8 or later. - PHP 4.3.x or later

This script takes about 10 seconds to set up, it makes albums of every folder you create in its root dir and automatically creates thumbs of all the images. All you have to do is add your photo's/pictures to its root. Im currently using v0.52, next release is planned to have:

- 1- Seperate ini file so its easier for the users to edit main folder issues.
- 2- Ability to change the colors
- 3- Naming the gallery(Folder name now)
- 4- Open original file controls
- 5- Background image selection

Try it!

**Another great utility!**, Aug 17th, 2007

We liked this utility because it only requires one swf and one php file...exactly what we were seeking. This saved us a ton of time...thanks!
