eMail Collector

Hits: 1,448

Description: Provided by: American Financing
Wouldn't it be nice to have a simple eMail Collector script installed on your website so you could offer promotions, notifications or whatever you could think of ? This eMail Form Script was designed to do just that. It's scripting is simplistic in every way. You can modify it to anything you want! This simple eMail script will notify you when someone enters their eMail address by sending you a notification then send them a confirmation email as well, and if that's not enough it also saves their emails in a text file on your website.

Resource Specifications

Version:	2.2
Platform(s):	linux, windows
