Generating an Html page dynamically

Hits: 2,693

Description: This code takes the html formatted text from a textarea box and builds an online page out of it dynamically. It opens a window and displays the html text.

Resource Specifications

Version:	1.0.0
Platform(s):	linux, windows, freebsd, osx, sun
Date Added:	Jan 30th, 2007
Last Updated:	Jan 30th, 2007
Author:	linkstraffic

Average Visitor Rating:  **4.00** (out of 5)

Number of Ratings: 2 Votes

Average Member Rating:  **0.00** (out of 5)

Number of Reviews: 0 Reviews
