AFC Validate Form

Hits: 2,385

Description: Provided by: American Financing. AFC Validate Form is an advanced Contact Form that you can place on your own personal website to prevent user abuse. Protect your form, comment area, guestbook or shopping cart from automatic submissions.

An advanced form validation using a captcha image that changes, such as used in Google, Yahoo, Paypal, eBay, Lycos and many other advanced form validation network forms will help you secure your website.

The contact form will also send the person who filled out the form a confirmation email, set to whatever you so desire to say.

All files are included along with install instructions to get you up and running in no time.
