# Speak Cal

Hits: 854

**Description:** Speak Cal is a command line Speaking calendar that Stores and recalls text associated with a day of the calendar. It's intended use is for an eyes free interface. Screen readers have a difficult time with calendars. This is my solution.

It Features:

- \* Easy to use browser for a virtual calendar. speak\_cal calendar is audio only.
- \* Speaks the month, year, and day as well as any text that the user has entered to be associated with that day.
- \* Stores and recalls any text data the user enters and associates it with the day of the browser calendar.
