Ajax RSS Reader

Hits: 5,816

Description: This component allows to enrich the content of your website with the information provided by other websites using the RSS format. This RSS Reader uses Ajax technologies and nice Javascript effects, giving your site a great look and fresh content. This component is packaged as Dreamweaver Extension; you can insert the RSS contents on your web site with single clicks. No programming skills required. You can configure visually the different parameters used for visualization.

Browser side RSS reader, Feb 9th, 2007

Reviewed By: peterhartmann

I found it useful since the page starts to load the RSS feed on the browser side, so my users now don't need to wait until the RSS load process completes on the server side to start reading the page. I also love using Ajax without requiring hand coding and this extension allows it. Thanks.
