FAQMasterFlexPlus Multi Lingual

Hits: 3,343

Description: The popular Faqs program done better. FAQMasterFlexPlus now supports Windows and has support for French and English plus other Languages can easily be added. Main fixes include switching links, which use the Get method, to Forms, which uses Post, to allow the application to run in deep directories without running into the max URL size error. Moved the Admin User ID and password into the MySql database for improved security. Re-wrote those sections that were not Windows compatable so as to support Windows Servers. The original FAQMasterFlex App can be upgraded to this new Secure Version without a problem.

Resource Specifications
