RiotPix PHP Message Board

Hits: 4,369

Description: The RiotPix message board was born out of frustration of not being able to find a simple PHP/MySQL forum that could easily be re-coded by the end user. Most forums were either so complex that many weeks of studying the code were necessary to adapt it, OR they were so simple that they needed a ton of work to do anything at all. RiotPix attempts to alleviate that problem by providing a simple avatar message board. To top it off, most message boards (even the large scale ones like phpBB) remain non-compliant of w3c standards. This board is XHTML 1.0 compliant, css compliant, and RSS 2.0 or Atom 1.0 compliant as well.

Resource Specifications

Version:	0.52
Platform(s):	linux, windows, freebsd, osx, sun
Date Added:	Feb 26th, 2007
Last Updated:	Mar 16th, 2008
Author:	Javod Khalaj

Average Visitor Rating:  **4.00** (out of 5)

Number of Ratings: 9 Votes

Average Member Rating:  **0.00** (out of 5)

Number of Reviews: 0 Reviews
