Last month I went on a domain name purchase frenzy, thinking that I would be able to turn them into working websites in a short time. Well life has it's twisted and turns and I'm going back to school now with no time to work on my projects.

I saw Domain Money Maker and it was exactly what I needed. In 5 minutes flat I was able to configure this script and have dynamic content on my site. Because of the resale rights, I was able to turn around and make my money back in two days. A++++

Great script !, Apr 1st, 2007

I have the DMM Pro script and it works just fine for what it is. I don't have anything bad to say. I would also like to say the customer support from the author is also great. No complaints here. If you want to create niche sites this is the script to use.

Domain Money Maker Rocks!, Apr 2nd, 2007

DMM can be used for everything from creating your own parked pages to creating adsense sites. Kicking out a DMM site is beyond simple & the support rocks. In fact, I had a feature suggestion & the author emailed me back the next day letting me know he coded the idea and it was ready to download. Anybody concerned about the backlink in the template being a footprint can rest easy, they provide an unencrypted version so you can remove it. All in all, A++!

WOW, Fantastic Script!, Jun 7th, 2007

I now use this script on all my unused domains! I make enough adsense income to cover all my hosting and renewal fees, plus some pocket money on top. The script pays for it self. It took me all of 10 minutes to setup. Excellent live support chats on the website. I will definitely be buying the later versions too! 5 stars *****
RECOMMENDED.

Domain Money Maker - A Solid Script, Jun 15th, 2007

I was impressed with the simplicity of the script and the professional looking website the script produced. I was also pleased to discover that I didn't have to program anything and that no database was required. I was able to edit the script in my html editor and add additional text and banner ads without any trouble. If you're a Commission Junction (eBay) Google AdSense affiliate you can easily add your pid ID's to the script. AdSense and eBay feeds are piped in based on keywords you choose.

Great Script for the price, Nov 9th, 2007

I purchased Domain Money Maker Gold. This script has made my life a lot easier. It is very simple to setup and use, plus generates a great looking website. I use it to park domains and the first site I created got picked up by Google in just 3 days. The code is totally open source so you can edit without a problem, but I liked the standard templates so much that I also bought the extra template pack. Stop wasting money on cash parking that takes a percentage of ad revenue.

THEY TOOK MY MONEY!, May 1st, 2008

The site says easy to install. No changing of files to get it to work. I paid my money and they responded to my email very quickly and said that files need to be changed to send my ftp info. I sent in and three weeks later nothing after several emails. Bottom line is they took my money. If this product is so good why only 6 good reviews. They are phony in my opinion so they can milk more people out of their \$99. Easy should mean easy with no additional consideration. RUN FAST!

They will Take your Money!, May 29th, 2008

I must agree with brianbemis. This script is plain crap! Took days to get it. They don't even know how to support it.

KNOW THIS: IT WILL NOT WORK WITHOUT CPanel hosting. THEY DO NOT TELL YOU THIS. Look here:

<http://domainzaar.com/requirements.php>

They never say, CPANEL REQUIRED. Without it, it will simple not work. They refuse to even try to help you get it to work. They take your money and run. They have NO Idea what domain parking even is.

What a HUGE JOKE!, Jun 29th, 2008

These guys tell you one thing and do another. I bought the software. Waited and waited and waited for a response and never got one. Then I get an email that says they were moving. Still no response after the move and over two months later. RUN!RUN!RUN!...oh and you can't get a refund through paypal so hang it up and you just wasted a hundred bucks basically.

Ok scrip , Is not worth the price., Aug 19th, 2008

Recently bought the scrip. First, the support suck user doesn't get back to me. I have contact them few time one small error can't get it fix. The price is little to much for what it can do.I would say save your money because i believe the sell would even contact you.
