## EternalMart Mailing List Manager Pro

Hits: 2,694

**Description:** EternalMart Mailing List Manager Pro provides a web interface to allow your visitors add their email addresses to your mailing lists. The email addresses are stored in MySQL database. It is suitable for new products announcements, newsletters or website update notifications. You can use web-based administrative control panel to send your messages to your subscribers and maintain your mailing lists and subscribers.

We believe that a consistent style in web site is important. Thus we separate the logic from HTML code in this script. You can design your own layouts by editing form templates with web page authoring tools. You can also use our predefined form templates and create the subscription form quickly and easily.

With predefined form templates, you can choose a suitable predefined form and create the web form instantly. After the form is created, you may edit the form to suit your needs. It saves your time.

**VERY POOR HELP, I MEAN NO HELP AT ALL**, Apr 6th, 2007

Reviewed By: roland49

I had problems trying to create the database using their file. I sent a support request. Never received an answer ! Loosing my time as this site seems DEAD or lost somewhere in the universe. STAY AWAY... NO HELP, NO SUPPORT, NO SUPPORT VIA EMAIL, NO SUPPORT VIA FORUM. Their main goal: let's gave no support ! Very frustating ! If you can't support your script, just don't offer them.
