iSalient - Survey Solution - Powerful creation, deployment, & reporting

Hits: 1,685

Description: iSalient provides a simple to follow pathway through the entire process of conducting a survey. When using iSalient, designing and creating survey forms, distributing the survey electronically via the web, collecting/entering and processing the responses, and finally graphically analyzing and presenting the results has never been easier. Using your responses and exporting them to another program such as a spreadsheet for further analysis gives you full control over your survey distribution process. No code is involved in the creation of a dynamic, condition and logic based survey design. Take all of the hard work of hand coding surveys and centralize all of your designs into one application. During the creation of your surveys, you have multiple options for the types of questions that can be inserted into your survey including One Answer Drop Downs, Matrix formatted questions, Checkboxes, Radio buttons, Form Sliders and Graphical Slider types, File uploads & more...

Resource Specifications
