The Google PageRank Checker Tool

Hits: 1,520

Description: Awesome traffic generator! The PageRank Checker Tool is not just another Google page rank checker tool. This one really works! It returns the Google PageRank for multiple web sites in addition to verifying listings in DMOZ and Yahoo, and returns the number of backlinks in Yahoo as well as the age of the domain. Does not require a Google API key! PageRank-Checker-Tool.com provides this program as either a downloadable php script for your own server or as one of two simple HTML code snippets that you can include on any website thereby utilizing the script on our server (remotely hosted). Styles can be easily customized to fit your web page theme. Does not rely on the Google API for results.

Resource Specifications

Version:	1.2
