php File Manager - now with Lightbox

Hits: 3,968

Description: php File Manager, now with a uniquely integrated version of multiMediaBox, is a web-based File Manager that is easy to configure for a novice yet easily customized for the more experienced user. The built-in login system within php File Manager, using the latest php technology, provides an encrypted and secure environment to ensure the protection of your files. php File Manager can create, rename and delete folders; create, upload, rename, download and delete files; edit text files; view image files; sort by Name, Size, Mode and Date Modified. Several language add-ons are available as well. Visit our site for a demo!

Great File Manager, Jun 29th, 2007

Reviewed By: vancestringer

Unfortunately, I've spent a few dollars trying two other file managers. I found this file manager and was thoroughly impressed! It's attractive and intuitive and, most importantly, it has all the features I was seeking. I highly recommend their script.
