## Free Image Hosting Script

Hits: 8,134

**Description:** DXL dev' Image Hosting Script is a PHP turnkey script that allows you to start an imagehost in just a minute. Your visitors will be able to upload their pictures, and will get BB or HTML code showing their images and linking back to your site, so it's SEO-friendly. The script is very easy to install and requires no MySQL database. AdSense is already embedded so you only have to enter your ID to earn revenue from your site!

### Resource Specifications
