QuickerSite v2.2

Hits: 4,664

Description: QuickerSite is an easy-to-use web-based Content Management System (CMS). Anyone who can work with MS Word (or any text-processor) is able to build & manage a website with QuickerSite. No IT-background or knowledge of HTML is required! Some basic knowledge of web-related terminology can however be very useful. Words like 'online & offline', a "link", a "button" or "Homepage" should somehow sound familiar.

QuickerSite 1.7.5 is written in ASP(.NET) & VBScript. No components/dll's to install, 100 % open scripting! QuickerSite is fully tested on IIS 5.0 (W2K), 5.1 (XP), 6.0 (2003) and 7.0 (Vista & Windows 2008). The complete QS-archive takes 6 MB. Any commercial windows-hosting solution is suited to host one or more QuickerSites.

QuickerSite uses the UTF-8 charset for displaying characters. This allows any language to be used for your site!

Best free CMS I've worked with, Jul 29th, 2007

Reviewed By: LesC

Very easy-to-use CMS program for beginners, and in the same time one with powerful tools for the more advance users... comes with a fully working design, which you easily can change inside the system without any html knowledge, or you can start from scratch and use your own templates. It can even handle custom ASP scripts within the system... in one word (or two anyway): awesome stuff!!
