# WebCards

Hits: 6,847

**Description:** This software enables a Webmaster to add an e-card system to their website.

The Webmaster can upload images for the user to put on their e-cards. He then has full control to add/edit/delete any of the pictures. The system includes a full administration control panel including ability to ban by email address and IP address, edit messages sent to recipients of a WebCard, template/CSS editor, ability to add/remove/edit further administrators and an admin toolbox for various maintenance tasks.

The "send WebCard" page features the ability to filter images by category and will also verify email addresses. The system outputs friendly error messages and instructions on how to remedy the situation. A full installer is also included.

Multiple image support - pictures, java applets, Macromedia Flash files - customisable displays through our "macro" system

Advanced options and bandwidth-saving settings

Automatic thumbnail generation

Robust ban settings

Multiple language support

## Resource Specifications
