HeadlineMap: Google Maps News Mashup

Hits: 1,690

Description: HeadlineMap is a great new Google Maps news mashup that combines current stories from many world news sources with a mapping interface. Depending on the region you are viewing news is being pulled from the largest regional news organizations and plotted for you by the story location. Other technical ingredients and content of this mashup include the Google Maps API, Topix.net and Flickr content. You can put HeadlineMap seamlessly on your website and you can adjust it by dimensions and location
