Simple One Page Gallery

Hits: 5,928

Description: The script is only one page and very portable, just set 8 variables and the script will automatically read all the images in a designated folder. Simple one page gallery is also able to create thumbnails on the fly by utilising the popular ASPJPEG com object. Simple one page gallery is also able to paginate the images and display however many images per page. Another feature is that the script can display a larger version of the thumbnails.

Resource Specifications
