PHP Contact Form

Hits: 863

Description: PHP Contact Form is the perfect form to email script for any project. The script comes as a basic form for easy installation even for beginners, but is scalable enough for more custom, advanced applications.

Our Basic Contact Form is our most popular item, and comes with 2 files. The first is the html form to place into your web page. The other is the php file to process that information, send it to your email, and display the thank you message. All you have to do is edit the email address to send the form data to.
